About This Game

VIRZOOM VR GAMING SYSTEM

Virtual Reality Sports
"Play VR. Get Fit." That's what VirZOOM does. We make virtual reality games for an active motion controller where your pedaling and leaning propel you through race tracks, battlegrounds, soaring skies, and pictorial countrysides in the forms of an F1 pilot, a tank commander, a Pegasus, a cyclist, and more.

Other online players automatically drop in and drop out of your games to provide competition and cooperation in matches up to 8 players. Make friends and challenge them to ghost competitions over a period of time, winner take all! Or choose your own workout and goals, collecting coins along the way to upgrade your avatars.

Outside the game you can manage your challenges, tune your workouts, and track your stats on MyVirZOOM and link them to Fitbit and Strava.

VirZOOM Arcade Games
"VirZOOM Arcade" is our free collection of sport arcade games, available on Steam and the PlayStation Store.

Our game controls and physics provide maximum VR comfort to play in large virtual worlds. No teleporting—your virtual movement reflects your actual movement. And though the games are designed for our bike controller for sport and exercise, you can also play them for free with a regular controller. More players means more fun for everyone, step up to a bike when you're ready!

Beyond our games, use the Gamepad Emulator (only available on PC) to turn your bike into a virtual joystick, keyboard, and mouse to play popular games. Configure your own mappings or use the ones we've made for Project Cars, EVE Valkyrie, and Radial-G. If you're a developer, from homebrew to AAA, add VirZOOM bike and motion controls to your games for free with our Unity SDK.

The VirZOOM Bike

Actively experience virtual reality with the VirZOOM Bike Controller, priced and sized for home use by the whole family. Now try it with a 30-day money-back guarantee.

Integrated sensors in the bike track your pedaling speed forward and backward. Not just cadence but the responsiveness you require for high performance gaming. Triggers and buttons are built into the grips to take air, get bursts of speed, and blast away obstacles. Lean on the bike to steer naturally using your VR system's position tracking—our extra wide base keeps you planted!

Choose the pedaling resistance that suits you to increase your score or speed or difficulty in our games. Heartrate sensors in the grips determine the calories you burn on every ride.

The bike operates silently to be able to hear your games, and folds up easily to move in and out of your play area. 2 AA batteries power it for months to communicate wirelessly to your VR system without cords.

VR System Not Included

You must have your own VR system to play VirZOOM, but luckily it is compatible with all major systems having position tracking:
Oculus Rift (with acceptable PC)
HTC Vive (with acceptable PC)
Windows Mixed Reality (with acceptable PC)
PlayStation VR (with PS4)

this game is great. there are different phonexes each with their own ablites. the game is hard but not unfiar and the levels take just enought time to enjoy them

10/10. i love this game as much as i love God

i'm an aethist. I played for about 20 minutes and honestly didnt find it that funny. Maybe its just my sense of humor but I did not enjoy it.. This game is fun.

That ♥♥♥♥ing ♥♥♥♥♥♥♥t level with the 3 wolfs is not.. Space Invaders Extreme is awesome and this shooter game has excellent music. The End!. 100% worth, amazing game. Escape the room, DLC was worth if it's on sale because typical escape rooms IRL are $30+ so it's 100% worth.. Good mod, but...

It gets repitive after you beat the mod once. As in, you've beaten all of the maps, now you play them again. I still think it's a great mod, it looks fantastic for a GoldSource engine mod/game.. Amazing game, I can't tell you how good this is. It's like mount and blade but better!

Interesting little game if you enjoy mazes. Fun for a few minutes in between games or if you just want a quick run. There is a nice progressive difficuly with the mazes, reminds me of a more modern version of Chip's Challenge back on older computers. It combines Speed Running with quick thinking, memory and making sure you have necessary items. Instead of Keys the levels have different items such as boats to travel across water, mushrooms and different things related to the type of enviornment Fatty happens to be challenging.

Yes, you play as a Fat guy stuck in a maze. 10\/10.

As for price, get it on sale. Only paid about $5 for this.. Hi I Recomend Getting This Game Its Got Some Few Buggs And Its Challenging And Sometimes (this is a hint) Commands dont go were expected! Im On Lvl 7 Is Fun And A Cool Game Enjoy And Its Cheap!. Quite challenging but simple arcade with 3 difficulty settings and colorful graphics. The soundtrack is cool, but repeats alot.
There doesn't seem to be much variation in the levels, so it can become boring fast.

There are alot of coupons for Virtual Top, so it shouldn't be hard to get it cheaper for an easy 100% achievement completion.. 10/10 Would idle for cards again.. Love this game! You can jump in and out of it quickly as you have time. It logs quests and auto- maps once you have the skill. It rewards reading the NPC text by giving you new quests or not... If you just click through NPC stuff you will miss out. You can game the game. You can optimise every actions or just roleplay it. I played it and then replayed it to exploite my knowledge of the game engine. There are tons of tricks and stratagy. Love it!!!
